system can be pre-set with up to five external sync sources, plus internal, such that if the 1st source fails, it will automatically switch to the 2nd, and so on. It is strongly recommended that all items of digital equipment connected digitally to the console, are synchronised to the same sync signal. If the console's internal sync is to be the master, other digital equipment should be synchronised to the digital outputs of the console. External AES Sources - Please note that the facility for locking to external AES sources is restricted to the first six inputs of each AES card in the console. One of the external sources can be Video, (PAL or NTSC). TTL Wordclock is
