

Marti Model DR-10 RPU Receiver - USED (2240 - O)

£99.99

Marti Model DR-10 RPU Receiver - USED (2240 - O) The model DR -10 is a rack mounted base station receiver designed for VHF or UHF broadcast remote pickup service. The receiver only requires 1 3/4" of rack space and is recommended as a cost effective replacement for older tube -type and solid state re- ceivers in areas of moderate signal density and interference. Dual frequency capability is standard, with tone decoding and audio companding available as options. The DR -10 is designed for 25 KHz bandwidth channels only and has 7.5 KHz audio low pass filtering. The item has been used, therefore shows a few stickers and use marks. But it is good
